The game is an action RPG developed by BigBlueButton games, a Nordic game studio with a rich history of creating games for consoles. An extremely large-scale world with a variety of characters and environments are created, and the game features a focus on action and horror. We want to create an online game that is fun to play and exciting to experience, not a MMO (massively multiplayer online) game for lazy players. A vast world, a thrilling story, and a variety of other features can be found in The Elden Ring Game! ■ Story The year is ~1501. This is a time when the Nobility and Magic are celebrated and possessed by a dark force. When the human hero, Yuusuke, loses his memory, he ends up in the world of Wyval, where he is taken in by a human girl, Coss. Coss had lost her memory. She did not know who she was or where she came from. Yuusuke had once been a prince who had lost his memory. He had been sentenced to a dungeon for his crimes. The two heroes, who only knew each other as strangers, decide to go their separate ways. ■ Features ● A Vast World Full of Excitement A vast world that is filled with an abundance of objects, characters, and environments. The open fields with the beautiful scenery are an unusual sight for players who have been playing games for a long time. The rich and complex environments that are inspired by a fantasy setting make you feel as if you are walking into a different world. ● Create your Own Character In addition to customizing your character's appearance, you can freely combine the weapons, armor, and magic that you equip. The various attributes you can increase include your muscle strength, sensitivity, and ability to use magic. The style you play varies according to your play style, so you can develop your character according to your play style. ● An Epic Drama Born from a Myth A multilayered story told in fragments. An epic drama in which the various thoughts of the characters intersect in the Lands Between. ● An Online Game that Loosely Connects You to Others In addition to the classic multiplayer mode, where you can directly connect with other players and travel together, the game supports an asynchronous online element. Connections to other players and private conversations with other users can also be made. Even if

You can freely customize your character's appearance and weapons with the "Item Management" function. You can also freely mix and match the weapons and armor of the other party members. You can freely customize your character's appearance and weapons with the "Item Management" function. You can also freely mix and match the weapons and armor of the other party members. Battle System: FINAL FANTASY TACTICS RPG battles with a distinction similar to the Items that are inherited by your character. In the FINAL FANTASY TACTICS RPG battle system, the game world has been divided into vast areas called stages. When the story progresses, each stage hosts special units and items, as well as enemies and bosses. The battle system of Final Fantasy Tactics uses the Final Fantasy Tactics system to control a battle. The battle screen shows a preview of the current situation on the field and the map. The party team has two major parts. The first is the core team, a "primary" party. This consists of the main characters, who will act as the focus for the battle. In the case of a party containing more than two members, this team is composed of characters with more direct connections to the story. A number of optional party members can be also added, and their ranks are indicated with a number. As the party levels, the support character's capabilities will increase. The other is the support team, the "support" party. The battle system controls a support character who will increase the power of a specific area on the map when the battle is over. If the support team is reduced to zero, or if the function of the support team is canceled by an event such as "puppet" or a special event, "endurance" is decreased. If the function is canceled and the support team remains, the party will be forced to retreat. In Final Fantasy Tactics, the battle consists of a main battle and an enhanced battle. The "main battle" is a "wargame" battle in which a battle line is formed on the battle map and the battles are fought. The "enhanced battle" is a battle between a "primary" party and a group of opponents, "explanation" and "endurance" are necessary to fight in this battle. The "explanation" is a battle between a primary party and an enemy party. The "explanation" gives a party a constant advantage. The enhanced battle is an "attack" or "gu
