Ross River virus is endemic throughout Australia and is regarded as the most common arboviral disease in that country. It has been responsible for several epidemic and epidemic-like outbreaks over the last 25 years and poses a considerable public health threat. Based on the experience of the past 25 years it would seem that Ross River virus disease is endemic throughout the Australian continent. There is no evidence to suggest that the virus is widely distributed, but there is some evidence that the virus may be of Australian origin. There is no effective treatment for RRV infection.Officer Francisco Vazquez is assigned to the Charlotte-Mecklenburg Police Department's Special Investigations Unit, which is responsible for working on cases that involve old crime scenes. These sites include old apartment buildings, vacant lots, and abandoned buildings where the person who committed the crimes has usually long since disappeared. The scene he's looking at, from a few years ago, has a very familiar ring. "Old tombs, empty. You find, kind of, the history of your neighborhood or the county. From, actually, the French Revolution is all over here, so it's kind of interesting," Vazquez says. His department has the manpower and resources to even look at these sites. They can take photographs of the crime scenes and the houses built on top of them, and search for evidence, like body remains. They've been searching for years, but it's not always clear who was buried there. It's with this in mind that a pair of Vazquez's officers are going to be investigating a lot of old graves lately. In April, the police found a group of bones during a search of the grounds of the McGavock United Methodist Church in Charlotte, which closed in 2014. Two students and their parents have been arrested and face murder charges 6d1f23a050
